

Low Voltage Power Supply

CUSTOMISED SWITCH MODE POWER SUPPLY FOR AIR-CONDITIONER

OUTLINES

Open Frame Power Supply specially developed for the use in air-conditioning systems. Also applicable to various home appliance purposes.

FEATURES

- high reliability
- compact size
- safety class II, EN 60335

SPECIFICATIONS

ENVIRONMENTAL CHARACTERISTICS	
Operation Temperature	-20°C -/+60°C @outside of case
Storage Temperature	-40°C - +85°C
Cooling Condition	Natural convection
Operation Environment	Indoor use
INPUT CHARACTERISTICS	
Input Voltage (Vin)	Rated: 230 Vac Single Phase Range: 176-276 Vac
Input Frequency	Rated: 50 - 60 Hz Range: 49 - 62 Hz
Input Power	16W max. @rated output power and rated Vin

VOLTAGE CHARACTERISTICS

Output Voltage	16 Vdc
Output Current	0,8 Adc
Max. Cont. Output Power	12,8 W @ rated ambient temperature

POWER

Electronic Devices Europe GmbH

SUPPLY
Panasonic

Design and Specifications are subject to change without notice. Ask the factory for technical specifications before purchase and/or use. If there is any doubt regarding the safety of this product, kindly inform us immediately for technical consultation.
